

BARRINGTON HOMES EMBRACES THE FOUR ELEMENTS OF SUSTAINABILITY TO CREATE THE ESSENCE OF HARMONIOUS LIVING.

Our philosophy is to be both socially and environmentally responsive and responsible in the design and construction of our homes. The principle we are guided by is the creation of harmonious living spaces, while minimising the impact on our environment.

> ROCHESTER II 37.6sq

The Rochester II is a stylish and spacious home with a number of adaptable living spaces to suit most lifestyle needs. The design is well suited for knockdown/rebuild sites and offers a drive through garage.

The home features a downstairs study or guest bedroom located adjacent to a well appointed bathroom. The separate living room can also easily be adapted to a home theatre. The rear living and dining areas are well proportioned and offer great connectivity to outdoor spaces such as the optional alfresco area. The addition of the optional butlers pantry creates plenty of bench space to an already generous kitchen. Upstairs there are four large bedrooms with the master suite offering a walk in robe and a spacious ensuite with optional free standing bath. The huge upstairs rumpus/activity area features a walk in linen and can be modified to offer an additional sixth bedroom option.
